Registration																																																																																																																																																					
Welcome/Housekeeping																																																																																																																																																					
Keynote: <b>Prof. Andrew Cruden</b> , Chair: Prof. Haiping Du, Room: Lindsay Stewart																																																																																																																																																					
<b>Advanced Electric Vehicle Technologies and Components</b> , Chair: Dr Ahmed Rezk, Room: 3/11																																																																																																																																																					
AS3	Modelling-based approach to design a PID controller in electric powertrains Rohullah Rahmatullah, Necibe Fusun Oymen-Serteller, Ayca Ak																																																																																																																																																				
33	Analysis of Axial-Field Flux-Reversal Permanent-Magnet Magnetic-Differential Motors Using Different Iron Materials Tengbo Yang, K. T. Chao, Yao Tang, Zhuiwei Xu																																																																																																																																																				
55	Multiple-Frequency Simultaneous Wireless Power Transmission for In-Vehicle Applications Hongliang Pang, K. T. Chao, Tengbo Yang, Songtao Li																																																																																																																																																				
AS4	Feasibility study on Design and Implementation of Electric Motor Jowly Fernandes, Ahmed Rezk, Jose Sodre																																																																																																																																																				
47	Feedback Linearization Controller Design for Solid Oxide Fuel Cells Donggil Kim, Jaehoon Kim, Jisoo Kim, Lee Dongik																																																																																																																																																				
Lunch																																																																																																																																																					
Keynote: <b>Prof. Iryna Zenyuk</b> , Chair: Dr Patrick Jochem, Room: Lindsay Stewart																																																																																																																																																					
<b>Vehicle design/Efficiency and Performance</b> , Chair: Dr Ahmed Rezk, Room: 3/11																																																																																																																																																					
49	Sliding mode control design using pwm modulation method for induction motor speed control Rohullah Rahmatullah, Necibe Fusun Oymen-Serteller, Ayca Ak																																																																																																																																																				
88	Real-time comprehensive condition monitoring technique for SiC MOSFET-based inverters in EV applications Javad Naghibi, Kamyar Mehran, Martin Foster																																																																																																																																																				
AS2	Gear Design of Electric Vehicle Powertrain Zaid Alkhatib, Stehio Silva, Fazle Rabby, Dhanraj Singh, Ahmed Rezk, Jose Sodre
